

Baltimore Gas and Electric Company (BGE) Small Business Lighting Solutions

a BGE Smart Energy Savers ProgramSM

In today's competitive marketplace, small businesses need to make every dollar count. Making your business more energy efficient is an effective way to reduce energy use and save money.

Small Business Lighting Solutions is a dynamic turnkey lighting program tailored to help small business owners—such as delis, dry cleaners, convenience stores, florists, cafés, and others—use energy more efficiently.

Key Features

When you decide to upgrade your existing lighting fixtures and controls, your business can receive:

- **Free onsite energy analysis of your company's electrical equipment** and a report that presents the cost-benefit analysis of proposed energy efficiency measures
- **Financial incentives** that cover 80% of the total cost of most energy efficiency lighting retrofit project (materials, labor, and recycling)
- **Equipment installation** at your convenience
- **Simple, cost-effective options** to help you maximize energy savings
- **Removal and environmentally friendly disposal** of fluorescent lamps and ballasts
- **Fast return on investment** with the program's financial incentives
- **Education and technical assistance** to help you take advantage of other BGE Smart Energy Savers Program offerings

Businesses Benefit with Energy Efficient Lighting

- Reduced energy use and energy costs
- Reduced air conditioning costs (energy efficient lights operate cooler than standard efficiency lighting)
- Reduced lamp replacement costs (due to the longer lamp life of energy efficient lamps)

Equipment

Equipment available for installation may include:

- Lighting upgrades
- Lighting controls
- Exit sign conversion or replacement (non-LED to LED)
- Refrigerated beverage machine controls

Eligibility

The Small Business Lighting Solutions program is available to small commercial customers in the BGE service territory who have an average monthly billing demand of 60 kilowatts or less (tariff codes G and GS). Participating customers must use approved program contractors assigned to their geographic area.
